

Mail Prep and Entry 20 oz PER Subgroup

January 17, 2013

- **Welcome**
- **Mission**
- **Review Current CSR**
- **Discuss Alternatives**
- **Next Steps**

- Evaluate potential to increase max PER weight up to 24 oz within the comail pool
 - Affects flats automation environment

- Current CSR 325 allows up to 5% of pieces in the non-carrier route portion to weigh up to 22 ounces and be cobundled - DMM 705.11.
- The pieces weighing over 20 ounces must meet standards for automation flats.
- Mailers must provide acceptance personnel a “version summary report” showing which titles or editions weigh between 20 ounces and 22 ounces.

- Maintain existing CSR 325
- Modify existing CSR from 22 oz to 24 oz
 - Current parameters maintained
- Revise existing CSR from 22 oz to 24 oz
 - Modify parameters
- Increase max PER weight from 20 oz to 24 oz
